

MAGNUM- Bifocals

The **MAGNUM-** Bifocals feature bifocal lens embedded into the base of the lens.

Made from the same grade and quality of polycarbonate material as used in many of our AS/NZS1337 certified safety glasses, the **MAGNUM-** Bifocals provide an alternative, hassle free option compared to the use of overspecs and goggles.

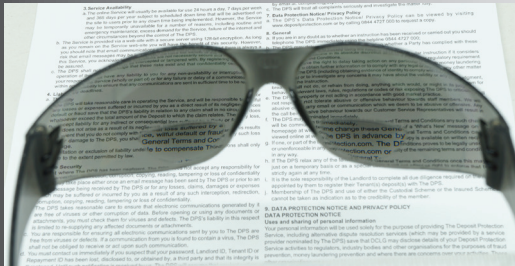

Set in a clear or smoke lens, you can choose your preferred magnification.

Testing guide:

Hold a book or newspaper at arms length.

Wear a pair of **MAGNUM-** Bifocals.

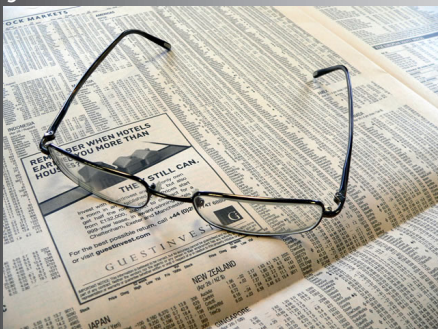

If text is blurred, select another magnification power and try again.

Code	Description
068+150	150 Magnification Clear Lens
068+200	200 Magnification Clear Lens
068+250	250 Magnification Clear Lens
068+300	300 Magnification Clear Lens
